

To whom it may concern:

RE: Professional Installation Attestation.

The ER-200 is an intrinsically safe, hazardous rated, piece of equipment. This means that in continuous presence of up to 30% Hydrogren atmosphere there will not be sufficient energy present to cause a spark.

The intended use of this product is in the Oil and Gas industrial settings to monitor corrosion of pipelines or other infrastructure (tanks/vessels).

The ER-200 must be installed in accordance with IEC 60079-14 and (NEC) National Electric Code for that region.

Typically these devices are sold to distributors or directly to companies for the oil and gas industry and then commissioned by Cosasco Personnel or Cosasco Representatives that have been adequately trained in the use and installation of the equipment.

Sincerely,

A handwritten signature in black ink that reads "Michelle Branum". The signature is fluid and cursive, with a long, sweeping underline.

Michelle Branum, CKC CS  
On behalf of Tony Anderson, Cosasco
